

# langAR

Learning a foreign language with  
Augmented Reality

# Problem

Learning languages is hard

People tend to learn better by having a more meaningful connection between words/phrases and tangible objects

Encountering certain objects does not occur on a regular basis

# Solution

Create a tangible object in a familiar place, and have the words right there besides it!

# Impact

Learn languages faster, easier, and anywhere - even on your lunch break!

# Improvements

Can be expanded to any language

Can implement voice recognition

Grammar concepts, and complex sentence structure

Track your progress; repeat words/phrases you struggle with

Make it a game for added fun!
